I understand the risks involved with anesthesia and surgery. Any number of reasons including ill health or adverse reactions could result in complications or loss of life, although this is rare. In the event that this should occur, I will not hold the doctors, or staff of South Tyler Animal Clinic responsible in any way. I agree to pay in full for all services rendered including those deemed necessary for medical or surgical complications or otherwise unforeseen circumstances. The nature and purpose of the procedures, possible alternative methods of treatment, risks involved, and possibility of complications have been fully explained to me. I acknowledge that no guarantee or assurance has been made as to the results that may be obtained.

**Pre-Surgical/Anesthetic Blood Screening**

Elective surgery requires general anesthesia, which carries potential risks to the patient. To help reduce those risks, we recommend bloodwork prior to the procedure. Our in-house lab enables us to run blood chemistries minutes before anesthetic induction. These tests are similar to those your physician would run if you were undergoing anesthesia. Test results also will serve as future reference values should your pet become ill.

Preanesthetic Blood Screening.....Cost = \$89.50
